# Andiya

Half of the people on the planet experience menstruation every month, and technology is trying to meet the needs and tastes of different people with its progress.

Feeling the urgent need to improve the health of women, especially in the field of menstrual health, made Andiya company to start producing new products in response to this important need.

We went step by step with the world's science in the field of menstrual health and started to build the new world of Andiya's menstrual health

Andiya is with the women of the world so that no woman's life is disrupted due to the natural cycle of the body  
And by preventing millions of wastes from entering the nature, preserve the green earth for future generations.

receive international licenses

# Andiya menstrual cup

Andiya Cup is a soft and flexible device that is placed inside the vagina and collects menstrual fluid instead of absorbing it. After 8 hours, it can be emptied and reused, and there is no need to use a sanitary napkin and it's not a tampon. Menstrual cups are highly regarded in different countries of the world as a new generation of menstrual health products, and the number of women who prefer using menstrual cups to other menstrual health products is increasing every day.

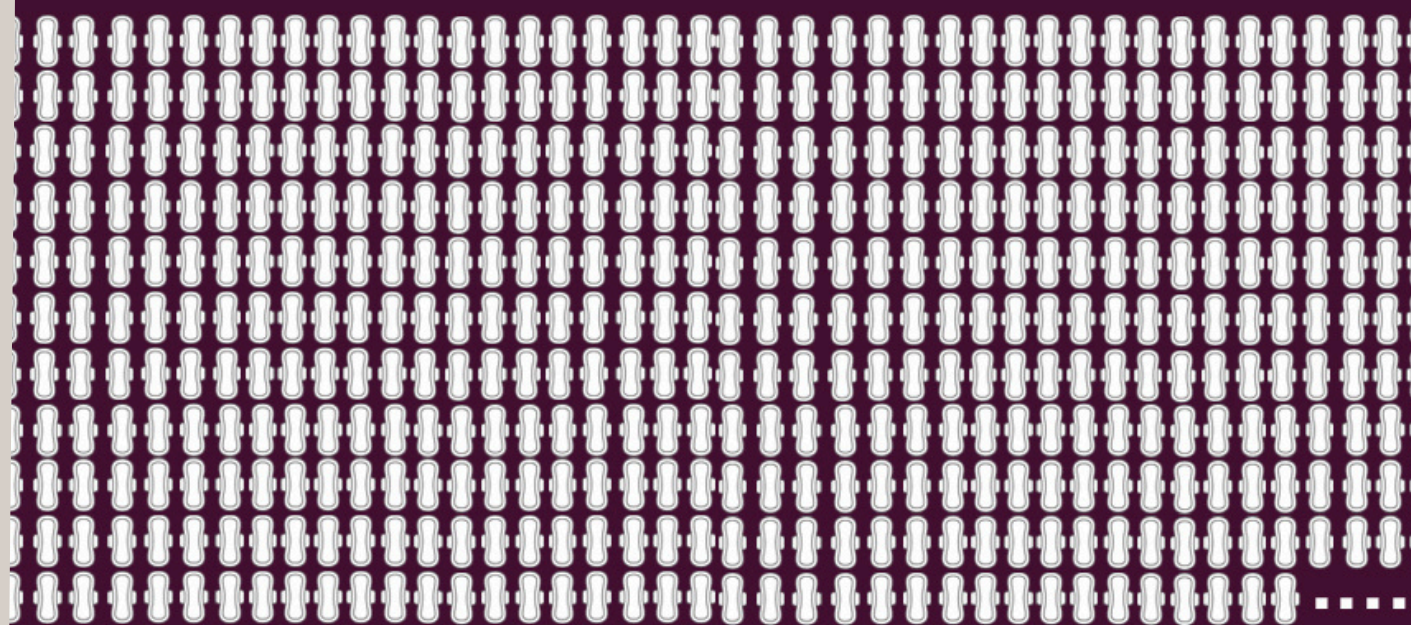

- Made of 100% medical silicone
- Without causing dryness, sensitivity and inflammation of the vagina
- Maintaining normal microbial flora and normal pH of the vagina
- Less risk for vaginal infections
- Free of any chemicals and phthalates
- Comfortable sleep without worrying about blood leakage
- Without unpleasant smell, itching and burning
- Can be used during sports, travel, workplace and swimming pool
- Can be used up to 10 years

Andiya Cup has successfully passed sensitivity, irritation and cytotoxicity tests

## Menstrual cup and environmental protection

Each of us uses more than 11,000 non-recyclable disposable products during menstruation.

It means almost as high as the Eiffel Tower! and that's apart from the nylon junk next to them! and now consider this amount of waste for a population of 40 million! what will happen?

Period is considered a natural cycle of every woman's life and what would be good if the natural cycle of the body does not produce any unrecyclable waste. And a seemingly simple decision of ours can prevent millions of wastes from entering nature.

It takes 500 years to decompose each tampon in nature! and its decomposition causes serious harm to animals and living beings because of the nylons and plastic materials used in it.

Andia Cup is made of medical silicone and completely safe and without plastic, it is a big step to love nature and our environment.

Inside all Andiacup packages, flower seeds are placed as a gift on the side  
The beginning of a new world and a new life to nature.

# Andiya Menstrual Cup Size Selection Guide

Color: pink and purple

# Andiya menstrual cup sterilizer

Disinfecting the menstrual cup at the beginning of the menstrual period and at the end of it is a very necessary thing that must be repeated in every period of its use, and the menstrual cup should never be used without boiling and disinfection.

Andiya menstrual cup sterilizer is a polymer container made of medical grade TPE, we put the menstrual cup inside the sterilizer and pour enough water inside it and then sterilize it in the microwave for five minutes. It is no longer necessary to boil the menstrual cup on the stove and in the pot.

Andiya's pastel and modern colors, including: purple, pink, blue and green, bring us into a new world of colors and beauty

Andiya sterilizer is made with medical polymer, which has more sterilization power than other similar products, and the materials used inside it are formulated in such a way It has become that bacteria and microbes are hardly absorbed by it or in the least possible state.

So you can perform the sterile menstrual cup operation more safely and easily.

Andiya sterilizer does not transmit any harmful substances and is 100% recyclable.

- Can be used safely in the microwave
- Made of TPE medical grade
- Perforated door for water vapor to escape
- Durable and light body
- Easy to use and hinged door
- Recyclable and BPA free

Sterilize and disinfect the menstrual cup in 5 minutes
